SKILLS

- **Languages:** Python, C++, Java and JSON
- **Tools/Platforms:** AWS, MySQL, Azure, Google Cloud, Linux, GitHub, Docker, CodeRabbit
- **Soft Skills:** Problem-Solving Skills, Adaptability, Time Management, Team Player

PROJECTS

- **TimeCapsule – Time Locked Secure Data Storage Application | [Github](#)** Mar' 2026
Engineered a secure, decentralized data vault utilizing distributed storage architecture (IPFS) and automated state-execution logic to cryptographically lock digital assets and sensitive information until precisely predetermined future timestamps.
Developed an intuitive, React-based frontend interface that seamlessly handles user interactions and allows for the precise configuration of time-lock parameters for secure deposits.
Implemented robust automated CI/CD workflows integrating AI-driven code review tools (CodeRabbit) and continuous security checks to enforce strict vulnerability standards and maintain high reliability across the application's infrastructure.

Tech: React, Next.js, Distributed Storage (IPFS), Automated Workflows, CI/CD automation
- **Git Guard AI – AI-Powered Security Tool for Git Workflow | [Github](#)** Jan' 2026
Developed a proactive security tool that leverages a trained machine learning model to detect sensitive information (API keys, secrets, credentials) within code before commits are finalized.
Implemented automated scanning of staged files to identify potential security vulnerabilities, reducing the risk of accidental data exposure in public and private repositories.
Engineered a Python-based integration that fits into the standard Git workflow, providing developers with real-time feedback and warnings with 97% of staged files.

Tech: Python, TensorFlow, .h5
- **PinSearch – Automated Reverse Image Search Utility | [Github](#)** Feb' 2025
Architected a Python-based automation tool designed to trace the original sources of Pinterest posts, streamlining the process of finding high-resolution or primary-source content.
Integrated Reverse Image Search APIs to cross-reference Pinterest image metadata against global web indexes, significantly increasing search efficiency.
Implemented error-handling protocols to manage varying web structures and rate-limiting, ensuring consistent performance across different search queries.

Tech: Python, TensorFlow, SerpAI

CERTIFICATES

- AWS Cloud Foundation Course Badge Jan' 2025 – May 2025
- Social Networks – NPTEL IIT Madras Jan' 2025 – Apr' 2025

ACHIEVEMENTS

- **Earned top badges in competitive coding platforms for consistence performance:** Nov' 2025
- **Solved 150+ coding problems across GFG, LeetCode and HackerRank:** Oct' 2025

EDUCATION

- **Lovely Professional University** Punjab, India
Bachelor of Technology - Computer Science and Engineering; CGPA: 8.01 Aug' 2023 – Present
- **Kendriya Vidyalaya Godhra** Godhra, Gujarat
Intermediate; Percentage: 77% Apr' 2021 – Mar' 2022
- **Kendriya Vidyalaya Godhra** Godhra, Gujarat
Matriculation; Percentage: 92% Apr' 2019 – Mar' 2020
